

The Freight Forwarder welcomes you

Nicolette van der Jagt, CLECAT

- ✓ demonstrate results of the projects
- ✓ how progress was reached
- ✓ challenges we came across
- ✓ have your

Feedback!

- ✓ CLECAT is representing more than 19.000 companies in **logistics, freight forwarding and Customs services.**
- ✓ Multinational, medium and small freight forwarders and Customs agents.
- ✓ CLECAT has 24 national organisations of European freight related service providers in membership.
- ✓ <http://www.clecat.org/>

- ✓ growth of international trade/e-commerce
- ✓ ever increasing regulations and requirements in international trade
- ✓ the amount of customs declarations and other border formalities are increasing ..
- ✓ need for new skill sets (IT, auditing & reporting, process management etc)
- ✓ urgent need to find new ways to cope with this while keeping 'goods moving' .. CORE provided insight on how to bring this in practice

- ✓ Digitalisation not the goal in itself but needed to process data automatically and add intelligence
- ✓ Logistical service providers already have large amounts of data but not yet able to exchange data to full extent: **building data pipelines** supports this
- ✓ More use of automated administrative processes and the exchange of data will lead to more time for core business and added value; **better plan operations in advance** with clients to allow for **better forecasting when goods arrive**

PROGRAMME
